PathCentre – *The Western Australian Centre for Pathology and Medical Research* - is a leading provider of pathology services to the Western Australian community. PathCentre provides a diverse range of pathology tests and services across the State of Western Australia. Our main laboratories are based in the Perth suburb of Nedlands at The Queen Elizabeth II Medical Centre site. Our staff comprises experts of international reputation including specialist pathologists in all fields backed by the highest calibre scientific staff. All PathCentre laboratories provide a 365-day, 24-hour service. PathCentre provides diagnostic pathology services for the major metropolitan teaching hospital—Sir Charles Gairdner Hospital—and other metropolitan and rural public hospitals and is also a referral centre for private pathology providers, patients and medical practitioners.

PathCentre also performs public health and other specialist testing for many State and private agencies. This includes the provision of Forensic Pathology and Forensic Biology consultancy and testing services for The Office of the State Coroner and The Western Australian Police Service respectively.
